months**

## USE SAMSENTRY FOR:

### **SAM Benchmark**

Review your current processes and practices against the industry standards and best practice with over 500 reviews performed globally over past 5 years.

### **Business Case**

Use SAMSentry recommendations & timeline to detail business requirements for an effective SAM system.

### **Compare Automated Assessments**

SAM is a journey so it's important to prioritise areas where you can be effective and fundamental that you can measure your progress. Easily compare assessment results with graphical representations for key processes.

### **Support Existing Discovery Technology**

Reliable discovery & licence reports are the result of accurate and focussed management of software & hardware. SAMSentry can provide context and insight to fast track results.

### **'First Line Audit Defence'**

Use SAMSentry to demonstrate control and governance to software publishers that request licence or usage reports.

### **Report to Internal Management**

Graphical reporting with clear visual data allows SAM Managers to demonstrate to management team's in a succinct and practical manner.

Get quicker results by employing SAMSentry to support your existing discovery & licence management technologies. Automatically review, prioritise, design & build your SAM management system.
